Each group has 8-10 minutes plus 3 more for questions (13 is absolute max!). You should prepare a few (2-3) live-demos of your code, to show that your algorithm works and that its runtimes are in line with expectations. Make sure you pick out a reasonable set of test cases (i.e. large enough, varied enough). Also make sure that you select and practice the commands ahead of time so you do not lose time on the “demo effect”. Presentation order:
1. Nigina Daniyarova, Menna Khaliel, Al Mazzoli
2. Nitisha Bhandari, Sarah Coufal, Olga Shevchuk
3. Linh Le, Rachel Lee, Angie Yang
4. Zaynab Ghazi, Ha Phan, Yutong Wu
5. Sam Aronson, Ziyao Wang
6. Anna Goncharova, Haiqa Kamran, Esther Xu,
